### Emergency Fund Scenarios

**Directions:** Currently 70% of Americans have less than \$1,000 in savings. Your job is to educate consumers about the importance of having an emergency fund. You are to think of eight potential scenarios in which you may need to rely on an emergency fund. In the eight outside (exterior) boxes you will illustrate each of your potential emergency scenarios while giving a very brief description of each emergency at the top of each box. In the center box, you will need to describe how many months of living expenses are necessary at all times to maintain an emergency fund.
